

ICT, Does It Dominate The World Now? Top Tech. Trends 2019

Mohamed Salem

Senior Advisor to the President, Arab Academy for Science, Technology, and Maritime Transport.

ABSTRACT

Today, there are officially more mobile phone devices than people in the world. Considering that mobile phones are not just a communication means but actually it is the gateway that receives and deals with the endless products of the huge ICT industry, we can easily recognize how ICT is involved in our lives, the way we connect, the manner we work, how we travel, to which extent it helps to achieve a better health, and even it became the prime companion in our leisure time.

An industry with an estimated value of 5 trillion dollars in 2019 made ICT the largest of its kind. Investing billions of dollars in research, new trends like: artificial intelligence, blockchain, internet of things and cloud technology are shaping the image of the years to come, utilizing the massive advances in communications technology.

The speech will present the current status of global ICT industry, concentrating on six main top tech. trends: artificial intelligence, blockchain, internet of things, cloud to edge technology, beyond 5G, and smart cities. Eventually it will conclude with the answer to the “Title” question.
